

# Detailed Table of Contents

## **Preface . . . . . xvii**

A	Organization . . . . .	xviii
B	Role of Equilibrium Chemistry . . . . .	xviii
C	Computational Software . . . . .	xix
D	How to Use The Electronic Textbook's Features. . . . .	xix
E	Acknowledgments . . . . .	xxi
F	Updates, Ancillary Materials, and Future Editions . . . . .	xxiii
G	How To Contact the Author . . . . .	xxiii

## **Introduction to Analytical Chemistry . . . . . 1**

1A	What is Analytical Chemistry? . . . . .	2
1B	The Analytical Perspective . . . . .	5
1C	Common Analytical Problems. . . . .	7
1D	Key Terms. . . . .	8
1E	Chapter Summary . . . . .	8
1F	Problems . . . . .	9
1G	Solutions to Practice Exercises . . . . .	10

## **Basic Tools of Analytical Chemistry . . . . . 13**

2A	Measurements in Analytical Chemistry . . . . .	14
2A.1	Units of Measurement . . . . .	14
2A.2	Uncertainty in Measurements . . . . .	16
2B	Concentration . . . . .	18
2B.1	Molarity and Formality . . . . .	19
2B.2	Normality . . . . .	20
2B.3	Molality . . . . .	20
2B.4	Weight, Volume, and Weight-to-Volume Percents . . . . .	20
2B.5	Parts Per Million and Parts Per Billion . . . . .	20
2B.6	Converting Between Concentration Units . . . . .	21
2B.7	p-Functions . . . . .	21
2C	Stoichiometric Calculations. . . . .	23
2D	Basic Equipment. . . . .	25
2D.1	Equipment for Measuring Mass. . . . .	26
2D.2	Equipment for Measuring Volume . . . . .	26
2D.3	Equipment for Drying Samples. . . . .	29
2E	Preparing Solutions . . . . .	29
2E.1	Preparing Stock Solutions. . . . .	30
2E.2	Preparing Solutions by Dilution. . . . .	31

2F	Spreadsheets and Computational Software . . . . .	32
2G	The Laboratory Notebook . . . . .	33
2H	Key Terms . . . . .	34
2I	Chapter Summary . . . . .	34
2J	Problems . . . . .	34
2K	Solutions to Practice Exercises . . . . .	37
<b>The Vocabulary of Analytical Chemistry . . . . .</b>		<b>41</b>
3A	Analysis, Determination and Measurement . . . . .	42
3B	Techniques, Methods, Procedures, and Protocols . . . . .	43
3C	Classifying Analytical Techniques . . . . .	44
3D	Selecting an Analytical Method . . . . .	45
3D.1	Accuracy . . . . .	45
3D.2	Precision . . . . .	46
3D.3	Sensitivity . . . . .	46
3D.4	Specificity and Selectivity . . . . .	47
3D.5	Robustness and Ruggedness . . . . .	50
3D.6	Scale of Operation . . . . .	50
3D.7	Equipment, Time, and Cost . . . . .	52
3D.8	Making the Final Choice . . . . .	52
3E	Developing the Procedure . . . . .	53
3E.1	Compensating for Interferences . . . . .	53
3E.2	Calibration . . . . .	54
3E.3	Sampling . . . . .	54
3E.4	Validation . . . . .	55
3F	Protocols . . . . .	55
3G	The Importance of Analytical Methodology . . . . .	56
3H	Key Terms . . . . .	57
3I	Chapter Summary . . . . .	57
3J	Problems . . . . .	58
3K	Solutions to Practice Exercises . . . . .	61
<b>Evaluating Analytical Data . . . . .</b>		<b>63</b>
4A	Characterizing Measurements and Results . . . . .	64
4A.1	Measures of Central Tendency . . . . .	64
4A.2	Measures of Spread . . . . .	66
4B	Characterizing Experimental Errors . . . . .	68
4B.1	Errors That Affect Accuracy . . . . .	68
4B.2	Errors That Affect Precision . . . . .	73
4B.3	Error and Uncertainty . . . . .	75
4C	Propagation of Uncertainty . . . . .	76
4C.1	A Few Symbols . . . . .	77

4C.2	Uncertainty When Adding or Subtracting	77
4C.3	Uncertainty When Multiplying or Dividing	78
4C.4	Uncertainty for Mixed Operations	78
4C.5	Uncertainty for Other Mathematical Functions	79
4C.6	Is Calculating Uncertainty Actually Useful?	81
4D	The Distribution of Measurements and Results	82
4D.1	Populations and Samples	83
4D.2	Probability Distributions for Populations	83
4D.3	Confidence Intervals for Populations	89
4D.4	Probability Distributions for Samples	91
4D.5	Confidence Intervals for Samples	95
4D.6	A Cautionary Statement	96
4E	Statistical Analysis of Data	97
4E.1	Significance Testing	97
4E.2	Constructing a Significance Test	98
4E.3	One-Tailed and Two-Tailed Significance Tests	99
4E.4	Errors in Significance Testing	100
4F	Statistical Methods for Normal Distributions	101
4F.1	Comparing $\bar{X}$ to $\mu$	<b>101</b>
4F.2	Comparing $s^2$ to $\sigma^2$	103
4F.3	Comparing Two Sample Variances	104
4F.4	Comparing Two Sample Means	105
4F.5	Outliers	112
4G	Detection Limits	115
4H	Using Excel and R to Analyze Data	117
4H.1	Excel	117
4H.2	R	120
4I	Key Terms	128
4J	Chapter Summary	129
4K	Problems	129
4L	Solutions to Practice Exercises	139

## **Standardizing Analytical Methods . . . . . 147**

5A	Analytical Standards	148
5A.1	Primary and Secondary Standards	148
5A.2	Other Reagents	148
5A.3	Preparing a Standard Solution	149
5B	Calibrating the Signal ( $S_{total}$ )	150
5C	Determining the Sensitivity ( $k_A$ )	150
5C.1	Single-Point versus Multiple-Point Standardizations	151
5C.2	External Standards	152
5C.3	Standard Additions	155
5C.4	Internal Standards	161

5D	Linear Regression and Calibration Curves . . . . .	163
5D.1	Linear Regression of Straight Line Calibration Curves . . . . .	164
5D.2	Unweighted Linear Regression with Errors in $y$ . . . . .	164
5D.3	Weighted Linear Regression with Errors in $y$ . . . . .	174
5D.4	Weighted Linear Regression with Errors in Both $x$ and $y$ . . . . .	177
5D.5	Curvilinear and Multivariate Regression . . . . .	177
5E	Compensating for the Reagent Blank ( $S_{reag}$ ) . . . . .	178
5F	Using Excel and R for a Regression Analysis . . . . .	180
5F.1	Excel . . . . .	180
5F.2	R . . . . .	184
5G	Key Terms . . . . .	189
5H	Chapter Summary . . . . .	189
5I	Problems . . . . .	190
5J	Solutions to Practice Exercises . . . . .	194

## **Equilibrium Chemistry . . . . . 201**

6A	Reversible Reactions and Chemical Equilibria . . . . .	202
6B	Thermodynamics and Equilibrium Chemistry . . . . .	203
6C	Manipulating Equilibrium Constants . . . . .	205
6D	Equilibrium Constants for Chemical Reactions . . . . .	206
6D.1	Precipitation Reactions . . . . .	206
6D.2	Acid–Base Reactions . . . . .	206
6D.3	Complexation Reactions . . . . .	211
6D.4	Oxidation–Reduction (Redox) Reactions . . . . .	213
6E	Le Châtelier’s Principle . . . . .	216
6F	Ladder Diagrams . . . . .	218
6F.1	Ladder Diagrams for Acid–Base Equilibria . . . . .	219
6F.2	Ladder Diagrams for Complexation Equilibria . . . . .	222
6F.3	Ladder Diagram for Oxidation/Reduction Equilibria . . . . .	224
6G	Solving Equilibrium Problems . . . . .	225
6G.1	A Simple Problem—Solubility of $Pb(IO_3)_2$ . . . . .	226
6G.2	A More Complex Problem—The Common Ion Effect . . . . .	227
6G.3	A Systematic Approach to Solving Equilibrium Problems . . . . .	229
6G.4	pH of a Monoprotic Weak Acid . . . . .	231
6G.5	pH of a Polyprotic Acid or Base . . . . .	233
6G.6	Effect of Complexation on Solubility . . . . .	235
6H	Buffer Solutions . . . . .	237
6H.1	Systematic Solution to Buffer Problems . . . . .	238
6H.2	Representing Buffer Solutions with Ladder Diagrams . . . . .	240
6H.3	Preparing a Buffer . . . . .	241
6I	Activity Effects . . . . .	242
6J	Using Excel and R to Solve Equilibrium Problems . . . . .	247

6J.1	Excel	248
6J.2	R	251
6K	Some Final Thoughts on Equilibrium Calculations	254
6L	Key Terms	255
6M	Chapter Summary	255
6N	Problems	257
6O	Solutions to Practice Exercises	260

## **Collecting and Preparing Samples . . . . . 271**

7A	The Importance of Sampling	272
7B	Designing A Sampling Plan	275
7B.1	Where to Sample the Target Population	275
7B.2	What Type of Sample to Collect	279
7B.3	How Much Sample to Collect	281
7B.4	How Many Samples to Collect	283
7B.5	Minimizing the Overall Variance	285
7C	Implementing the Sampling Plan	287
7C.1	Solutions	287
7C.2	Gases	289
7C.3	Solids	291
7D	Separating the Analyte from Interferents	297
7E	General Theory of Separation Efficiency	297
7F	Classifying Separation Techniques	300
7F.1	Separations Based on Size	300
7F.2	Separations Based on Mass or Density	302
7F.3	Separations Based on Complexation Reactions (Masking)	304
7F.4	Separations Based on a Change of State	306
7F.5	Separations Based on a Partitioning Between Phases	309
7G	Liquid–Liquid Extractions	314
7G.1	Partition Coefficients and Distribution Ratios	314
7G.2	Liquid–Liquid Extraction With No Secondary Reactions	315
7G.3	Liquid–Liquid Extractions Involving Acid–Base Equilibria	318
7G.4	Liquid–Liquid Extraction of a Metal–Ligand Complex	320
7H	Separation Versus Preconcentration	323
7I	Key Terms	323
7K	Problems	324

## **Gravimetric Methods . . . . . 337**

8A	Overview of Gravimetric Methods	338
8A.1	Using Mass as an Analytical Signal	338
8A.2	Types of Gravimetric Methods	339
8A.3	Conservation of Mass	339

8A.4	Why Gravimetry is Important . . . . .	340
8B	Precipitation Gravimetry . . . . .	340
8B.1	Theory and Practice . . . . .	340
8B.2	Quantitative Applications . . . . .	354
8B.2	Qualitative Applications. . . . .	361
8B.3	Evaluating Precipitation Gravimetry. . . . .	361
8C	Volatilization Gravimetry . . . . .	362
8C.1	Theory and Practice . . . . .	362
	Thermogravimetry. . . . .	363
8C.2	Quantitative Applications . . . . .	367
8C.3	Evaluating Volatilization Gravimetry . . . . .	370
8D	Particulate Gravimetry . . . . .	371
8D.1	Theory and Practice. . . . .	371
8D.2	Quantitative Applications . . . . .	373
8D.3	Evaluating Particulate Gravimetry . . . . .	374
8E	Key Terms . . . . .	375
8F	Chapter Summary. . . . .	375
8G	Problems. . . . .	375
8H	Solutions to Practice Exercises. . . . .	385

## **Titrimetric Methods . . . . . 391**

9A	Overview of Titrimetry . . . . .	392
9A.1	Equivalence Points and End points . . . . .	392
9A.2	Volume as a Signal . . . . .	392
9A.3	Titration Curves. . . . .	394
9A.4	The Buret. . . . .	395
9B	Acid–Base Titrations. . . . .	396
9B.1	Acid–Base Titration Curves . . . . .	398
9B.2	Selecting and Evaluating the End Point . . . . .	406
9B.3	Titrations in Nonaqueous Solvents. . . . .	414
9B.5	Qualitative Applications. . . . .	428
9B.6	Characterization Applications . . . . .	429
9B.7	Evaluation of Acid–Base Titrimetry . . . . .	432
9C	Complexation Titrations . . . . .	437
9C.1	Chemistry and Properties of EDTA. . . . .	437
9C.2	Complexometric EDTA Titration Curves . . . . .	440
9C.3	Selecting and Evaluating the End point . . . . .	445
9C.4	Quantitative Applications . . . . .	450
9C.5	Evaluation of Complexation Titrimetry. . . . .	454
9D	Redox Titrations . . . . .	455
9D.1	Redox Titration Curves . . . . .	456
9D.2	Selecting and Evaluating the End point. . . . .	461
9D.3	Quantitative Applications . . . . .	467

9D.4	Evaluation of Redox Titrmetry	477
9E	Precipitation Titrations	478
9E.1	Titration Curves	478
9E.2	Selecting and Evaluating the End point	480
9E.3	Quantitative Applications	482
9E.4	Evaluation of Precipitation Titrmetry	485
9F	Key Terms	486
9G	Chapter Summary	486
9H	Problems	487
9I	Solutions to Practice Exercises	502

## **Spectroscopic Methods . . . . . 517**

10A	Overview of Spectroscopy	518
10A.1	What is Electromagnetic Radiation	518
10A.2	Photons as a Signal Source	521
10A.3	Basic Components of Spectroscopic Instruments	523
	Signal Processors	530
10B	Spectroscopy Based on Absorption	530
10B.1	Absorbance Spectra	530
10B.2	Transmittance and Absorbance	535
10B.3	Absorbance and Concentration: Beer's Law	537
10B.4	Beer's Law and Multicomponent Samples	538
10B.5	Limitations to Beer's Law	538
10C	UV/Vis and IR Spectroscopy	540
10C.1	Instrumentation	540
10C.2	Quantitative Applications	548
10C.3	Qualitative Applications	560
10C.4	Characterization Applications	562
10C.5	Evaluation of UV/Vis and IR Spectroscopy	568
10D	Atomic Absorption Spectroscopy	572
10D.1	Instrumentation	572
10D.2	Quantitative Applications	576
10D.3	- Evaluation of Atomic Absorption Spectroscopy	583
10E	Emission Spectroscopy	585
10F	Photoluminescence Spectroscopy	585
10F.1	Fluorescence and Phosphorescence Spectra	586
10F.2	Instrumentation	590
10F.3	Quantitative Applications	593
10F.4	Evaluation of Photoluminescence Spectroscopy	597
10G	Atomic Emission Spectroscopy	599
10G.1	Atomic Emission Spectra	599
10G.2	Equipment	600
10G.3	Quantitative Applications	601

10G.4	Evaluation of Atomic Emission Spectroscopy	607
10H	Spectroscopy Based on Scattering	608
10H.1	Origin of Scattering	608
10H.2	Turbidimetry and Nephelometry	609
10I	Key Terms	615
10J	Chapter Summary	616
10K	Problems	617
10L	Solutions to Practice Exercises	634

## **Electrochemical Methods . . . . . 637**

11A	Overview of Electrochemistry	638
11A.2	Five Important Concepts	638
11A.2	Controlling and Measuring Current and Potential	640
11A.3	Interfacial Electrochemical Techniques	643
11B	Potentiometric Methods	644
11B.1	Potentiometric Measurements	645
11B.2	Reference Electrodes	651
11B.3	Metallic Indicator Electrodes	655
11B.4	Membrane Electrodes	656
11B.5	Quantitative Applications	669
11B.6	Evaluation	678
11C	Coulometric Methods	681
11C.1	Controlled-Potential Coulometry	681
11C.2	Controlled-Current Coulometry	684
11C.3	Quantitative Applications	687
11C.4	Characterization Applications	693
11C.5	- Evaluation	694
11D	Voltammetric Methods	696
11D.1	Voltammetric Measurements	696
11D.2	Current in Voltammetry	698
11D.3	Shape of Voltammograms	703
11D.4	Quantitative and Qualitative Aspects of Voltammetry	703
11D.5	Voltammetric Techniques	705
11D.6	Quantitative Applications	714
11D.7	Characterization Applications	722
11D.8	Evaluation	726
11E	Key Terms	727
11F	Chapter Summary	728
11G	Problems	729
11H	Solutions to Practice Exercises	742

## **Chromatographic and Electrophoretic Methods . . . 747**

12A	Overview of Analytical Separations	748
-----	------------------------------------	-----

12A.1	Two Limitations of Liquid–Liquid Extractions. . . . .	748
12A.2	A Better Way to Separate Mixtures. . . . .	748
12A.3	Chromatographic Separations . . . . .	751
12A.4	Electrophoretic Separations . . . . .	752
12B	General Theory of Column Chromatography . . . . .	753
12B.1	Chromatographic Resolution . . . . .	755
12B.2	Solute Retention Factor . . . . .	756
12B.3	Selectivity. . . . .	759
12B.4	Column Efficiency . . . . .	759
12B.5	Peak Capacity. . . . .	761
12B.6	Asymmetric Peaks . . . . .	761
12C	Optimizing Chromatographic Separations. . . . .	762
12C.1	Using the Retention factor to Optimize Resolution . . . . .	763
12C.2	Using Selectivity to Optimize Resolution. . . . .	765
12C.3	Using Column Efficiency to Optimize Resolution . . . . .	766
12D	Gas Chromatography . . . . .	770
12D.1	Mobile Phase. . . . .	771
12D.2	Chromatographic Columns. . . . .	771
12D.3	Sample Introduction . . . . .	774
12D.4	Temperature Control. . . . .	778
12D.5	Detectors for Gas Chromatography. . . . .	778
12D.6	Quantitative Applications . . . . .	781
12D.7	Qualitative Applications . . . . .	785
12D.8	Evaluation . . . . .	789
12E	High-Performance Liquid Chromatography . . . . .	790
12E.1	HPLC Columns. . . . .	790
12E.2	Mobile Phases . . . . .	793
12E.3	HPLC Plumbing . . . . .	797
12E.4	Detectors for HPLC. . . . .	799
12E.5	Quantitative Applications. . . . .	803
12E.6	Evaluation . . . . .	806
12F	Other Forms of Liquid Chromatography . . . . .	806
12F.1	Liquid-Solid Adsorption Chromatography . . . . .	807
12F.2	Ion-Exchange Chromatography . . . . .	807
12F.3	Size-Exclusion Chromatography . . . . .	810
12F.4	Supercritical Fluid Chromatography. . . . .	812
12G	Electrophoresis . . . . .	814
12G.1	Theory of Capillary Electrophoresis. . . . .	814
12G.2	Instrumentation . . . . .	819
12G.3	Capillary Electrophoresis Methods . . . . .	823
12G.4	Evaluation . . . . .	828
12H	Key Terms. . . . .	828
12I	Chapter Summary. . . . .	829

12J	Problems	830
12K	Solutions to Practice Exercises	842

## **Kinetic Methods . . . . . 847**

13A	Kinetic Methods Versus Equilibrium Methods	848
13B	Chemical Kinetics	849
13B.1	Theory and Practice	849
13B.2	Classifying Chemical Kinetic Methods	851
13B.3	Making Kinetic Measurements	861
13B.4	Quantitative Applications	863
13B.5	Characterization Applications	866
13B.6	Evaluation of Chemical Kinetic Methods	870
	Accuracy	870
13C	Radiochemistry	873
13C.1	Theory and Practice	874
13C.2	Instrumentation	875
13C.3	Quantitative Applications	875
13C.4	Characterization Applications	879
13C.5	Evaluation	880
13D	Flow Injection Analysis	881
13D.1	Theory and Practice	881
13D.2	Instrumentation	884
13D.3	Quantitative Applications	889
13D.4	Evaluation	893
13E	Key Terms	894
13F	Summary	894
13G	Problems	895
13H	Solutions to Practice Exercises	903

## **Developing a Standard Method . . . . . 905**

14A	Optimizing the Experimental Procedure	906
14A.1	Response Surfaces	906
14A.2	Searching Algorithms for Response Surfaces	907
14A.3	Mathematical Models of Response Surfaces	914
14B	Verifying the Method	923
14B.1	Single Operator Characteristics	923
14B.2	Blind Analysis of Standard Samples	924
14B.3	Ruggedness Testing	924
14B.4	Equivalency Testing	927
14C	Validating the Method as a Standard Method	927
14C.1	Two-Sample Collaborative Testing	928
14C.2	Collaborative Testing and Analysis of Variance	932
14C.3	What is a Reasonable Result for a Collaborative Study?	938

14D	Using Excel and R for an Analysis of Variance. . . . .	939
14D.1	Excel . . . . .	939
14D.2	R. . . . .	940
14E	Key Terms . . . . .	942
14F	Summary . . . . .	942
14G	Problems. . . . .	943
14H	Solutions to Practice Exercises. . . . .	951

**Quality Assurance . . . . . 953**

15A	The Analytical Perspective—Revisited . . . . .	954
15B	Quality Control. . . . .	955
15C	Quality Assessment . . . . .	957
15C.1	Internal Methods of Quality Assessment . . . . .	957
15C.2	External Methods of Quality Assessment. . . . .	961
15D	Evaluating Quality Assurance Data . . . . .	962
15D.1	Prescriptive Approach . . . . .	962
15D.2	Performance-Based Approach . . . . .	965
15E	Key Terms . . . . .	972
15F	Chapter Summary . . . . .	972
15G	Problems. . . . .	973
15H	Solutions to Practice Exercises. . . . .	976

**Additional Resources . . . . . 979**

Chapter 1. . . . .	980
Chapter 2. . . . .	982
Chapter 3. . . . .	983
Chapter 4. . . . .	984
Chapter 5. . . . .	989
Chapter 6. . . . .	993
Chapter 7. . . . .	996
Chapter 8. . . . .	1000
Chapter 9. . . . .	1001
Chapter 10. . . . .	1004
Chapter 11. . . . .	1012
Chapter 12. . . . .	1017
Chapter 13. . . . .	1024
Chapter 14. . . . .	1027
Chapter 15. . . . .	1029
Active Learning Curricular Materials . . . . .	1030
